

Tencent AI

Tencent is applying its technology leadership, deep understanding of connection and user behavior and open platform/ecosystem to create AI breakthroughs that can solve the world's most pressing challenges. We are not innovating for its own sake or simply seeking to win AI contents. We are exploring how AI can enhance the quality of human life.

Tencent's mission is to enhance the quality of human life through Internet services and AI enables us to do this in powerful new ways. We are focused on solving key problems for our users, customers and society. Through fundamental and applied research, we seek to create products and services that make the benefits of AI accessible to everyone, everywhere.
